

# Burning Leaves On Windy Days Is Like Burning Money

## Be wise with fire.

While Cleaning Up Your Property... You Could Quickly Destroy It.

A simple household chore can start a nightmare wildfire in a matter of minutes. The wind can carry sparks from your fire to your neighbor's property. And the fire can quickly spread out of control, destroying thousands of acres of valuable land and real estate. March is Mississippi's "windy" month. If you're burning leaves and debris this spring, be cautious:

- Don't burn trash or debris on windy days.
- Remove leaves and needles from gutters.
- Keep piles of limbs and leaves at least 30 feet away from your home.

*You are responsible for damages caused by your carelessness.*

Check for burn ban information: **[www.mfc.ms.gov](http://www.mfc.ms.gov)**
